

GPS-Based Mobile Monitoring FOR POWERED ASSETS

G.P.S. Tracking, Fleet Management & Mobile Video Surveillance Systems

Assets at Risk

The statistics on powered assets targeted for theft are astounding:

- \$1 billion in equipment is stolen annually from construction sites
- Modular buildings are increasingly a target for crime according to police
- There are over 7 million recreational vehicles in the U.S.

The loss or destruction of a valuable powered asset can be devastating to your personal or commercial finances.

Advanced GPS

Protecting your valuable assets starts by using the latest in GPS-locatable devices. Today's devices are:

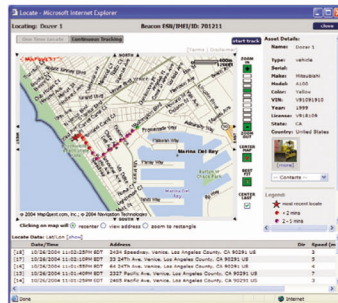

- **Small** for effective concealment
- **Locatable nationwide**
- **Self-contained**
- **Weather resistant** for extreme environments
- **Powered by back-up battery** in case of tampering
- **Cost-effective** for any powered asset

Web-Based Monitoring

Combined with a web-based mobile monitoring system, these GPS devices will provide an unprecedented level of security for your powered assets.

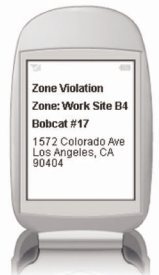

From your home or office, log-in to your secure portal to locate any of your assets, set schedules to automatically start a track or view detailed reports about asset activity.

The system also allows you to receive notifications via email or to your cell phone regarding suspicious activity about your assets such as:

- Zone departure
- Main power disconnect

There is always the option of having 24/7 third-party alarm monitoring of these events.

Armed with GPS

Using your mobile monitoring system, you are now equipped with critical information about the powered assets that are important to you:

Theft Detection

- Zone departure
- Main power disconnect

Theft Notification

- Email and cell phone alerts
- 24/7 third-party monitoring

Theft Recovery

- Locatable anytime, anywhere via the internet

To learn how easy it is to equip your 12V powered assets with GPS, please contact us:

Also Good for:

- Boats**
- Motorcycles**
- Snowmobiles**
- Quads**
- Generators**
- Rental Equipment**
